

Tactical Fireground Simulations

Some of the classes will be ran at Taylor Training center primarily for JFD. These courses will also be opened up to anyone from the county that wishes to take the course.

All of the weekday daytime courses at Taylor will be ran with the same format. Day one will cover units 1 and 2, day two will cover units 3, and 4. There will be two weekend courses that will be available. If the two courses are low registered (below 10), we may have to combine the two courses together.

This course is intended for students that have completed FSTFAC, but anyone who is an officer that has had to make fire ground decisions could take the course. Students that have had prior experience talking on the radio will be a plus.
